

WYMAN POND

Brighton Plt., Somerset County
U.S.G.S. Kingsbury, Maine (7½')

Fishes

White perch
Chain pickerel

White sucker
Pumpkinseed
sunfish

Physical Characteristics

Area - 218 acres

Maximum depth - 15 feet

Temperatures:

Surface - 73°F

15 feet - 72°F

Principal fisheries: White perch, chain pickerel

Wyman Pond is located south of Kelly Mountain. A small, boggy inlet enters the south shore and its outlet, Corson Brook, flows south into the West Branch of Wesserunsett Stream. The pond's shoreline is mostly undeveloped.

Water quality in Wyman Pond is poor for coldwater gamefish. Critically warm temperatures in the summer make this shallow pond much better suited to warmwater fish species. White perch and pickerel provide fisheries throughout the year.

Access to Wyman Pond is restricted by a private gated road off the West Bridgton Road. The pond is open to fishing under general law in both the summer and winter seasons. See the lawbook for additional regulations.

Surveyed - July, 1970
